

The JW Marriott Atlanta Buckhead along with all of Marriott International, believe we have a role to play in protecting our environment. We work in partnership with our hotel owners and franchisees to implement sustainable environmental practices, including conservation of natural resources, protection of indigenous wildlife, and reducing and recycling waste whenever possible. We feel strongly that these practices reflect the environmental interest and concerns of our guest, associates, business partners and communities. Please visit <http://www.marriott.com/environment> to learn more. Listed below are some of the environmentally friendly practices specific to the JW Marriott Atlanta Buckhead.

We Recycle...

- ♻️ All fluorescent light bulbs, fluorescent ballast and batteries in remote controls, guestroom locks, in-room keyboards and mini-bar system are recycled.
- ♻️ All kitchen grease waste materials are recycled.
- ♻️ Paper, cardboard and printer cartridges are also recycled.

We Give Back...

- ♻️ We have saved 750,000 gallons of water each month through our laundry's water reclamation system. The hotel is now utilizing 250,000 gallons of water each month while handling the linen needs of four other hotels.
- ♻️ We participate in Marriott's Spirit to Preserve the Rainforest program. Groups can request the hotel to contribute 5% of the guest room cost to the Amazon Rainforest.
- ♻️ We have partnered and donated food items with the Local Food Bank to minimize waste.

We Conserve...

- ♻️ Outside air filters are changed monthly and interior filters are changed quarterly to reduce consumption of energy.
- ♻️ Consistent cleaning schedules for air conditioning and refrigeration units to conserve energy.
- ♻️ Outdoor lighting is regulated by timers and light sensors to conserve power.
- ♻️ Outdoor water sprinklers are reduced and are timed efficiently.
- ♻️ We participate in Marriott's Linen Re-Use Program where linens in the guestrooms are laundered at the guest's request or every third day of stay.
- ♻️ We have installed eco-showerheads and sink aerators in all guestrooms to conserve water and are saving the hotel thousands of gallons every month.
- ♻️ Motion detection light systems installed in offices and all service landings to conserve power.

Green Meetings

This program minimizes harm to the environment during meetings and events, provides guidance and assistance in executing green meetings and meets the needs of the customer requesting a green meeting event. Contact us to make your next meeting **green**.
