

The Providence Marriott Downtown Is Inspiring the World Through Green Meetings

The Providence Marriott is working hard toward reducing its environmental impact and carbon footprint by minimizing waste, litter and reducing energy and water consumption

Proud to announce
our Green Certification!

By the RI Hospitality Association
Rhode Island Department of
Environmental Management

Meetings and Events

- Organic Menu
- 100% Recycled Note Pads
- Pens made from Recycled materials
- Eco-Friendly Water Service
- Meeting Room Recycling, where available
- On-Line Event Menus
- Organic Flowers (upon request)
- Recyclable Box Lunch Program
- Paperless Billing (upon request)

Providence Marriott Downtown

- Recycling Program-** The hotel has a recycling program in which Paper, Cardboard, Glass, Light Bulbs, Oil and Grease are recycled. By recycling these products it keeps them out of our landfill, saving resources and keeping our environment clean.
- Water Efficiency-** The hotel has installed new Marriott standard water efficient sinks and showerheads. We have been able to reduce water consumption without compromising the guest experience.
- Towel Program-** We participate in the Green Room Program which encourages our guests to reuse bath towels and bed linens rather than receive a new set every day. This program has reduced the water consumption in the laundry on a daily basis
- Ozone Washing Machines-** Unlike the traditional hot water washing systems, the ozone system uses cold water and ozone to clean sheets and garments faster and more efficient than normal hot water systems. The Ozone system reduces fuel consumption in the laundry area by more than 10%.
- Smart HVAC-** Guest rooms in the hotel are equipped with occupancy sensors. This device controls the activation of the HVAC system and operates only when the guest room is occupied.
- Energy Efficient Lights-** The hotel is 99% equipped with Energy Star certified efficient lighting which uses 70% less electricity than a normal fluorescent bulb. This drastically reduces the amount of electricity used by the hotel.
- Smoke-Free Environment-** As part of the Marriott Clean Air Initiative, the hotel's smoke free environment improves indoor air quality and reduces the energy used by air treatment devices.
- Ride Together-** Our complimentary hotel shuttle, is a great way to transport many guests at once. In addition the Airport Shuttle make regular stops at the hotel reducing the amount of cars on the road and the carbon footprint made by each guest.
- Green Education Program-** Our Environmental Committee, consisting of a manager from every department educates our staff on how to be green. They also discuss and implement new ways to keep the hotel moving in a green direction.
