

How will you change the world?

Make a difference when you book a meeting with the hospitality leader in setting environmentally-friendly standards and practices.

Marriott International continues to lead the hospitality industry in setting environmentally-friendly standards and practices and the Tampa Airport Marriott is no exception. The Tampa Airport Marriott recently received the distinction of being the first hotel in Hillsborough County to be designated as a Certified Green Lodge by the State of Florida Department of Environmental Protection.

By incorporating more sustainable practices, Marriott International and the Tampa Airport Marriott are proud to make a difference.

The Tampa Airport Marriott uses compact fluorescent and energy efficient light bulbs in all meeting space, public areas and guest rooms.

This has helped Marriott International replace 450,000 light bulbs and save 65% on hotel lighting costs.

The Tampa Airport Marriott uses water-saving toilets, low flow showerheads, low flow sink aerators and a reuse linen program.

This has helped Marriott International replace 400,000 showerheads to reduce hot water usage by 10%.

Every day, the Tampa Airport Marriott recycles kitchen grease, cardboard, office paper, furniture and other reusable materials.

Over the next 10 years, Marriott International will reduce greenhouse gas emissions by nearly 1 million tons; equivalent to eliminating 140,000 automobiles from our nation's highways.
