How to Arrange Flowers Like a Pro

Steps:

1. Choose a wrapped arrangement at any local store that includes at least one hydrangea.
2. Remove cellophane wrapping, separate each piece and lay on your workspace in front of you.
3. Fill vase $\frac{3}{4}$ full with water.
4. Trim the stems at an angle for better water uptake to the desired height within your vase.
5. Start with the largest hydrangea as the base layer of your arrangement. Smaller flowers and greenery are added between the blooms of the hydrangea to create the arrangement.
6. Place stems so they crisscross to hold each other in place evenly around the arrangement until all are used.
7. Enjoy!
8. Check water level every other day and fill so all stems are submerged. Change water if it becomes cloudy.
