# WHISKEY FLIGHTS

## Rye Not?

22

*High West Double Rye | Michter's US\*1 Straight Rye | Templeton Rye*

Similar to a bourbon, rye whiskeys must contain a minimum of 51% rye, aged a minimum of 2 years in new charred oak barrels, and bottled at no less than 80 proof. The rye in whiskeys provides a nice hint of pepper and spice on the palate.

## A Flight to Remember

25

*W.L. Weller 7yr Bourbon | Blanton's Single Barrel | Angel's Envy*

Enjoy these hand selected bourbons ranging from the 7yr "Baby Pappy Van Winkle", to the first bottled single barrel, and the "Breaking tradition" port finished bourbon. Which one is your favorite?

## Proof of Age

30

*Eagle Rare 10yr Single Barrel | Elijah Craig Small Batch 12yr | Lock, Stock & Barrel 13yr Rye*

Similar to a bourbon, rye whiskeys must contain a minimum of 51% rye, aged a minimum of 2 years in new charred oak barrels, and bottled at no less than 80 proof. The rye in whiskeys provides a nice hint of pepper and spice on the palate.

Whiskey can trace its history back to Irish monks and Scottish Royalty of the 1400s when it was called aqua viate. The gaelic translation was 'uisee beatha', meaning 'water of life'. Through the ages whiskey has gone through a long transformation process, from being a crude unaged clear liquid to the finely processed, mass produced barrel-aged delicacy we have today. Whether you spell it 'whisky' or 'whiskey' the spirit has a taste ranging from very complicated and heavily peated to very smooth daily sippers, something for everyone. Enjoy!

### WHAT ARE THE REASONS FOR DRINKING WHISKEY IN DIFFERENT WAYS:

#### NEAT

You want to feel how it comes out of the bottle. From barrel to bottle to mouth. Nothing altered.

#### WITH ICE

For a chilled and smooth experience. Many whiskeys over 100 proof can benefit from being chilled.

#### WITH WATER

Many whiskeys expand their taste greatly when you add a teaspoon or two of water. This reduces the alcohol content allowing the underlying taste profiles to flourish. This will mostly affect whiskeys that are 90 proof or higher. A whiskey might not taste better to you after water, but many will. The only way to find out is experimenting.
