Since its opening in 2011, the Courtyard by Marriott Paris Arcueil is committed in Corporate Social Responsibility (CSR) to improve our sustainable practices and reach our annual goals to reduce our carbon footprint.

Our core values are focused on Ethics, Integrity and Corporate Citizenship and we subscribe to the Spirit to Serve Philosophy of the Marriott Company : Spirit to Serve our Guests, our Associates and our Community.

Our efforts and actions are continuous, our main objectives are to :
• Reduce our carbon footprint by 20% until 2020
• Reduce waste
• Raise environmental awareness towards our employees, our guests, our partners and our providers

The Courtyard by Marriott Paris Arcueil has obtained several green labels such as the « Clef Verte », the environmental hotel label of OTCP (Paris Convention and Visitors Bureau), TripAdvisor EcoLeader Silver Level, and participates in many actions through the year.

Here are different areas in which our actions are undertaken :

• **Responsible Water Management** : we installed water saving valves to limit waste. All public water taps are equipped with sensors to work only the time required. Daily controls are made on the water meter by the Technical department to avoid any dysfunction. We also offer our customers to reduce their consumption of water, energy and cleaning products by not to changing towels and bed linen every day.

• **Energy saving** : in our rooms, the electricity works only in the presence of the customer, thanks to its room key. After every room cleaning, we take care of closing windows. Our lamps are essentially endowed with LED bulbs and with presence detectors in public areas.
• **Reducing waste and recycling**: our hotel acts on 
  recycling: glass, papers, boxes, plastics, bulbs, piles, corks, ink 
  cartridges. The best waste is the one not produced, we favor 
  bulk purchases, communication by e-mail and reading of 
  documents on screen. The hotel makes a commitment in 
  November with the company **Moulinot** for the virtuous 
  treatment and recycling of our bio waste.

• **Responsible purchasing**: we select suppliers engaged and concerned 
  about the environment, committed in sustainability. We get local fruits 
  and vegetable baskets for our employees. Our next objective will be to 
  favor sustainable fish.

• **Biodiversity**: our hotel partners with associations such as "**un toit 
  pour les abeilles**" (sponsoring of a hive from which we receive the 
  honey) or the WWF. This year our hotel participated in Pandathlon 
  organized by the WWF for the preservation of the Mont Blanc for which 
  5 **Marriott** Teams collected 6000 € of donations.

• **Associates’ awareness**: Our Green Team is in charge of training our staff on 
  eco-friendly gestures and to promote environment-friendly behaviors in the hotel 
  as well as at home. We share best practices several times a year during events 
  such as "Earth Hour", "European Week of Reduction of Waste " and, in April 
  "Marriott Green Awareness Month".

We count on you all, our Associates, Customers, Partners and Suppliers 
  to act in a responsible way and protect our planet!
