

Green Ride Boulder is a locally owned and operated airport shuttle, offering *hourly service to and from Denver International Airport*.

Our “Hub and Spoke” business model allows us to provide the most efficient, reliable, and affordable shuttle service to the Greater Boulder area.

GRB focuses on resource sustainability and minimal environmental impact. At our headquarters, we practice the “Three Rs”: recycle, repurpose, and reuse. Our reservation agents work from home, saving gasoline and the need to heat or cool additional office space. Our fleet of various-sized vehicles will be converted to alternative fuels.

Of course, a transportation company can never truly be “green enough”, but we take every step possible towards decreasing our carbon footprint. “A shared-ride” itself is environmentally responsible, in that every guest our drivers transport means one less vehicle on the road.

For guests’ convenience and assistance, Green Ride has an **Airport Counter** on **Level 5**, the Main Level of the DIA Terminal.

Reservations are required, though last-minute arrivals may check-in at the booth to ensure a seat on the next available shuttle. We arrive and depart hourly on *the East side of the Terminal*, outside **Door 505**, at **Island 3**.

Reservations are easily made online at www.greenrideboulder.com or by calling 303.997.0238.
